Internal Server Error

The server encountered an internal error or misconfiguration and was unable to complete your request.

Please contact the server administrator, webmaster@site5demo.com and inform them of the time the error occurred, and anything you might have done that may have caused the error.

More information about this error may be available in the server error log.

Additionally, a 404 Not Found error was encountered while trying to use an ErrorDocument to handle the request.

Version 2.0 UNRELEASED

Start: 03/Nov/14 Release: 15/Mar/15 Release Notes

Release

35 Warnings | **282** Issues in version | **281** Issues done | **6** Issues in progress | **3** Issues to do

Warnings indicate when the status of a JIRA issue doesn't reflect related development activity. For example: an issue marked complete that has an open pull request should be marked as still being in progress.

Manage Warnings

Unreviewed Code

These issues have been marked complete but the commits are not part of a pull request or review.

Angry Sprint Progress: 8 days left

8 issues 23/Jul/12 4:21 AM — 03/Aug/12 4:21 AM

~~NERD-1~~	As a Front-Ender I would like to stop supporting IE6 so I can enjoy my life	3
NERD-2	As a Hacker I would like more Red Bull so I can work all night	8
NERD-3	As the Dev Manager I would like to look busy so I can keep my job	
NERD-4	As an Outsourcerer I want to get paid for working in my pyjamas	20
NERD-5	As an Agilista I want to play buzzword bingo so I kan ban	
NERD-6	As the Founder I want to have the last say so I can get my way	13
NERD-8	As a Bug I want to fly in the face of progress	
NERD-7	As a Bug I want to make like hard for the Angry Nerds	

Upcoming Sprint 1

Start Sprint

NERD-9	As a Bug I want to be like The Beatles so I can be fab	
NERD-12	As a Front-Ender I would like to stop supporting IE7 so I can enjoy my life	5
NERD-13	As a Hacker I would like more pizza and beer	3
NERD-20	As a Hacker I would like to hack the mainframe and enter the Matrix	13
NERD-14	As a Dev Manager I want make everyone log time so I can make nice charts	8

Issues 5 Estimate 29

Upcoming Sprint 2

NERD-15	As an Outsourcerer I want to work more hours and get less done	3
NERD-16	As an Agilista I want to be lean to make the green, quicker	1
NERD-17	As an Agilista I want to iterate on the rate so I can rate the iteration	5

Issues 3 Estimate 9

Angry Nerds / NERD-4

As an Outsourcerer I want to get paid for working in my pyjamas

Estimate: 20

Increase the number of projects initially shown on the project list from 25 to 100
QA
Close Issue
Restart Progress
Details
Type: Improvement
Priority: Minor
Status: TO BE REVIEWED
Assignee: Norman Ma [Atlassian]
Description
Limiting the project list to 25 when there are only a few more than that causes a number of minor, but noticeable issues:
A visual delay and interruption when scrolling for just a few more entries
The possibility of missing that there are more when not completely scrolled (though could trigger earlier to avoid this)
Limited efficacy of Ctrl-F browser find to locate a project (by name or description) before scrolling
Not all users make a habit of using the repo search for a combination reasons (including preference and also limitations in how it how it works). To that end, the project list should serve its purpose more fully.

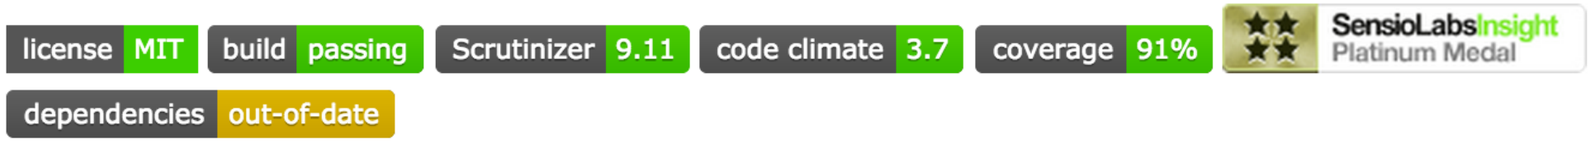
PhpHooks



PhpHooks is a collection of some useful **customizable** checks that you can use as git pre-commit hook before you commit some changes.

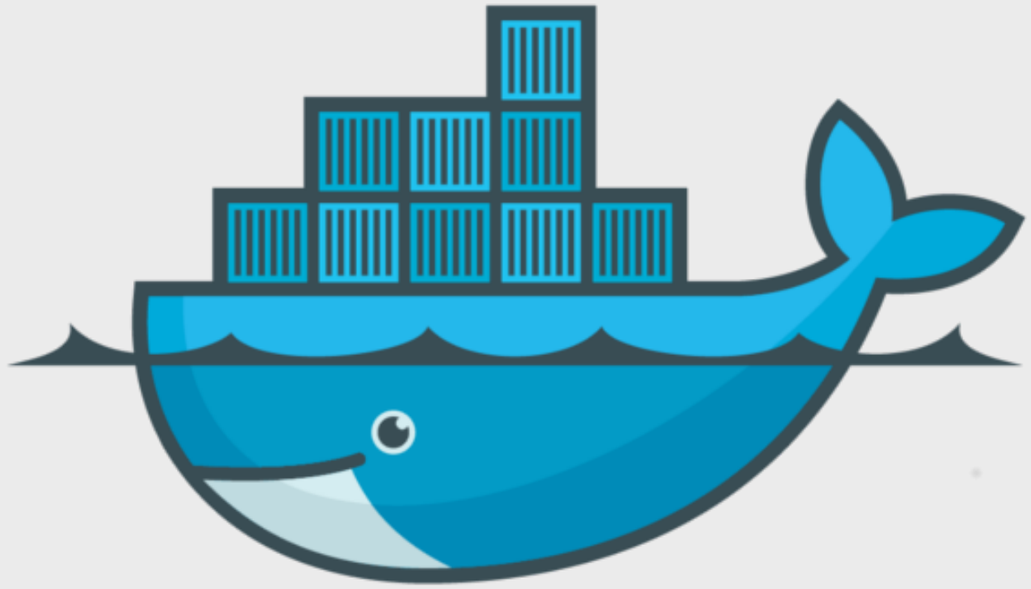
Features

Every change (or changes) that you do was checked at the time through:

- phplint - PHP syntax check
- forbidden - Check for forbidden methods like "die()", "var_dump()" and "print_r()"
- phpmd - Check for some code violations like codesize or naming
- phpcs - Check for coding standard violations
- phpcpd - Check for duplicate code
- phpunit - Check tests (only if configuration file is set!)
- security-checker - Check a given composer.lock file for known security vulnerabilities

https://github.com/tommy-muehle/php-hooks

Jenkins



docker

Das war's.

Noch eine abschließende Bemerkung ...
